

## STATE SAFETY INSPECTION

At Lex Brodie's, safety is our number one concern. When it's time for your annual State safety inspection, Cars, trucks, SUVs, and vans fail if:

### STEERING

- Any component is missing, improperly mounted, has excessive play, wear, binding, or leakage.

### ALIGNMENT

- Any wandering or unusual tread wear

### SUSPENSION

- Looseness, bottoming, or excessive wear on any component

### TIRES

- Tread depth is below 1/16 of an inch
- There are cuts, bumps, budes, knots, snags or showing cords or belts
- Does not display the "DOT" symbol on the sidewall
- Rubs or touches other parts of the vehicle
- Are of different sizes or types on the same axle

### WHEELS & RIMS

- Fasteners are missing, improperly mounted, excessively worn, rusted, or damaged
- Rim is cracked, dented, bent, repaired by welding or brazing, or improperly mounted

### EXHAUST SYSTEM

- Systems that fail to exit the undercarriage of the vehicle behind the rear tires, leaks, cut-outs, or non permanent repairs, or excessively noisy systems

### FUEL & INTAKE SYSTEM

- Any component of the system is missing, improperly mounted, not of an approved material, leaks, cracked, broken, cut, or improperly repaired.

### SERVICE BRAKES

- Any leaks in the system
- Excessive pedal travel, spongy or fading pedal
- Pad or shoe linings damaged or below wear limit
- Rotors or drums excessively grooved, beyond wear limit, cracked, or damaged
- Lines or hoses cracked, cut, stretched, or improperly installed
- When vehicle is tested for a straight stop, vehicle pulls to right or left
- Broken, missing, or improperly installed components

### PARKING BRAKES

- Does not hold the vehicle when applied in forward gear at double the idle rpm

### LAMPS

- Any lamp on the vehicle is not working, not mounted properly, is the wrong color, has cracked or broken lenses, is obscured by stickers, tape, or tinted lenses
- Headlamps, fog lamps, driving lamps are improperly aimed or of insufficient candlepower

### HORN

- Cannot be heard from 200 feet away, horn button is not easily accessible

### WINDOW TINT

- Sunscreening material extends below 4" from the top of the windshield measured in the center, or below the AS-1 line as marked at the edge of the windshield
- Tint on any other window of a passenger car measures below 29% as measured on -inspection station equipment
- Tint on windows to the immediate left & right of the driver of a truck or van having both right and left outside rear view mirrors measures below 29% as measured on inspection station equipment

### WINDSHIELD

- Any cracks, chips, scratches or discoloration on any part of the windshield.

### WINDSHIELD OTHER

- Any window glass is missing, has cracks, discolorations, chips, scratches, stickers, or decals that obscure the driver's vision
- Has sharp, exposed edges
- Is of an unapproved material or is improperly installed
- Driver's window regulator is inoperative

### WINDSHIELD WIPERS

- Any component is improperly mounted, missing, or damaged
- Wipers are too slow, smear, or streak
- Blades are improperly mounted, damaged, missing, hard, or do not completely clear water from wiped area

### REARVIEW MIRRORS

- Are improperly mounted, missing, cracked, discolored, or obscured.

### REGISTRATION

- Registration certificate is not original, is expired, not with the vehicle, is unreadable or otherwise not valid
- Vehicle's description, identification number, license plate number, or validation sticker number is not in agreement with the registration certificate
- License plate or plates missing, improperly mounted, not legible, or obscured
- Front plate not mounted if registered in a state or locality which issues two plates

### DOOR LATCHES

- Not secure or inoperable from both inside and outside vehicle

**SEATS & BELTS**

- Seats are missing, broken, improperly mounted, or slip out of set position
- Belts are missing, improperly mounted, frayed, deteriorated, are not an approved type, or have buckles that do not operate properly

**FENDERS**

- Are missing, improperly mounted, have sharp edges or protruding parts which cause a hazard to passersby, or do not cover the width of the tire tread

**BUMPERS**

- Are missing, improperly mounted, fail to extend beyond lights, made of an unapproved material (i.e.. wood), or damaged to the extent that sharp edges or protrusions are hazardous to passersby

**FLOOR PLAN**

- Conditions which create a hazard to occupants
- Holes which allow exhaust gasses to enter the passenger compartment

**BODY ITEMS**

- Doors missing, improperly mounted, or inoperable
- Missing or inoperative shift quadrant indicator (automatic transmission)
